ATLAS INCINERATORS **SERVICE & SPARE PARTS** SERVICE AGREEMENT CONCEPTS & PROGRAMS.

SPARE PARTS, DOCKING KITS & REMOTE SUPPORT

OEM SPARE PARTS

We are the sole supplier of spare parts for your incinerator, supplied by the following brands: ATLAS, Hyundai-ATLAS, ASI, ASWI VESTA, and MAXI.

As your OEM supplier, we ensure all spare parts fit your specific incinerator, and all PLC-related parts will be pre-installed with OEM software and necessary installations before we ship the spares to your required destination worldwide.

REMOTE SUPPORT

Our in-house team is experienced in working with our incinerators.

If you have any questions or need assistance with troubleshooting from a distance, you are always welcome to call.

KITS

We have developed a maintenance kit that includes the exact spare parts we recommend replacing in your incinerator when your vessel is docking. This proactive approach helps prevent the breakdown of MARPOL-critical equipment during voyages, reducing the risk of off-hire.

Additionally, timely replacement of wear-and-tear parts is essential for safe incineration, ensuring both vessel and crew safety.

To further enhance reliability, we also recommend keeping a spare kit on board, ensuring that crucial components are always readily available.

CERTIFIED REFRACTORY

One of the most essential components of the incinerator which ensures safety onboard your vessel, is the refractory. Hence, we do not compromise on the quality of our refractory materials and why we are known for having the strongest and longest-lasting refractory materials on the market.

The service and replacement of the refractory are crucial, not only for safety but also for the longevity of the incinerator. We have observed instances where customers attempt to replace the refractory themselves or through a third party, resulting in a significantly reduced lifespan of the incinerator. Always contact Atlas Incinerators for refractory and other spare parts.

Always contact Atlas Incinerators for refractory and other spare parts.

WE ARE HERE TO HELP

TECHNICAL SERVICE

We have a strong team of technical experts available wherever and whenever your incinerator might need service, repair or on-site troubleshooting.

If you contact us, we will assist in getting the right people to you as soon as possible.

Service hubs:

- China
- Singapore
- Dubai
- Denmark

PRE-DOCKING

Pre-docking inspections onboard by the manufacturer of your incinerator ensures that necessary maintenance and spares are ready for planned docking.

A comprehensive report on the condition and required repairs is completed for your maintenance planning purposes.

Additionally, we can estimate the cost of the necessary repairs.

SAFETY & HEALTH CHECK

We recommend conducting a Safety and Health check every 30 months to ensure your equipment remains safe for incineration.

Our local service engineers will come on board to inspect all mechanical and electrical components, replacing any worn or damaged parts as needed.

Additionally, if you have any specific concerns or require adjustments, we'll be happy to assist while we're on board.

ATLAS SERVICE AGREEMENT

ADVANTAGES

- Safe & Efficient Incineration
- Minimised Off-hire
- Minimised Risk of Accidents
- Fixed Service and Maintenance Cost
- Secured Availability of OEM Spare parts
- 12 Months Warranty on parts
- Preventive and Condition based Maintenance
- Close Collaboration and Dedicated Technical Support for Troubleshooting
- Reduced Internal Order Processing for quicker delivery of spare parts
- Pre-docking inspections free of charge in our 4 service hubs

Our top priority is to support our customers. Through service agreements, we formalise our collaboration and ensure we are always available for you.

With the Atlas Service Agreement Concept, our aim is to safeguard the availability, safety, and efficiency of your incinerator. By servicing and maintaining your incinerators according to a bespoke maintenance plan, we optimise uptime and minimise the risk of off-hire, as incinerators are critical MARPOL equipment.

We ensure that all spare parts and service engineers are ready at the agreed time and place.

We handle all logistics and planning related to maintenance from our end and contact you well in advance to coordinate accordingly. We offer a fixed payment solution to help you achieve financial savings, mitigate business risks, and avoid unforeseen expenditure.

SERVICE AGREEMENT CONCEPT

DEDICATED TECHNICAL SUPPORT

- A main point of contact who knows the maintenance and performance history of your incinerator
- Custom-made maintenance plan
- Ongoing Performance Evaluations
- Free access to remote support and troubleshooting
- Pre-docking inspections free of charge in our four worldwide service hubs.

SPARE PARTS

- 100% Spare Part availability for planned Maintenance
- Fixed Pricing scheme
- Top Quality refractory materials
- Supply and logistics of all spare parts and refractory materials

MAINTENANCE

- Safety and Health Checks
- Incinerator Inspections
- Docking Maintenance
- Refractory repair
